

VINOTHKANNA J R

Full Stack Developer - Python & Java - React & Django - Open to Onsite / Hybrid / Remote

+91 7010986536 , vinothkanna122004@gmail.com , Namakkal, TN, India

<https://github.com/CodeByVinoth> - <https://www.linkedin.com/in/vinothkanna-jr> - Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer and Computer Science graduate from Kongunadu College of Engineering and Technology with hands-on experience in Python, Java, Django, React, and Flutter. Recently completed a Software Developer Internship at Wattstrons, building 15+ production-grade React components and integrating 5+ RESTful APIs within Agile sprints. Skilled in scalable web and mobile application development, database management, and machine learning model deployment. Proven ability to write clean, maintainable code and collaborate effectively in cross-functional teams. Seeking a full-time Software Developer role to deliver efficient, full-stack solutions to impactful products.

SKILLS

Languages: Python, Java, JavaScript, HTML, CSS

Frameworks: Django, React, Tailwind CSS, Spring Boot

Databases & Tools: MySQL, Git, GitHub, Figma, RESTful APIs, VS Code, Postman

Concepts: OOP, MVC, Agile, SDLC, Responsive Design, API Integration, Machine Learning, CNN

PROFESSIONAL EXPERIENCE

Software Developer Intern - Wattstrons

Aug 2025 – Mar 2026 - React - Tailwind CSS - RESTful APIs

- Developed 15+ reusable React components with Tailwind CSS, reducing UI inconsistency and cutting frontend rework by approximately 30%.
- Integrated 5+ RESTful APIs, improving data reliability and eliminating critical client-server sync errors.
- Delivered responsive layouts across 3 Agile sprints, meeting all deadlines and receiving positive feedback from the team lead.

PROJECTS

Travel Bridge — Full Stack Travel Planning App — React, Spring Boot, MySQL

- Built a full-stack travel planning platform enabling flight search, hotel booking, itinerary management, and real-time weather updates, serving end-to-end trip planning in a single application.
- Developed RESTful backend APIs using Spring Boot with MySQL integration, implementing secure user authentication, CRUD operations, and error handling across all core modules.

Smart Leukemia Detection System — Python, MobileNetV2 CNN, Streamlit

- Trained MobileNetV2 transfer learning model on blood cell image datasets to classify and predict leukemia stages, achieving 92%+ classification accuracy.
- Deployed a real-time Streamlit web interface enabling instant AI-powered image predictions, reducing diagnosis response time and demonstrating end-to-end ML deployment capability.

Student Housing Management System — Django, MySQL, Python

- Architected a full-stack Django application automating room allocation and maintenance tracking for 100+ student records, reducing manual allocation time by approximately 50% with role-based access control.
- Designed a normalized MySQL schema and implemented Django authentication framework, improving query performance by approximately 40% and strengthening data security across all user roles.

EDUCATION

B.E. CSE - Kongunadu College of Engineering and Technology - 2021 – 2025 - CGPA: 7.9/10

HSC - Sri Vinayaga Matriculation Hr. Sec. School - 2020 – 2021 - 81.8%

SSLC - Sri Vinayaga Matriculation Hr. Sec. School - 2018 – 2019 - 78.2%

CERTIFICATIONS

Full Stack Java Developer - ExcelR (ID: 11099/EXCELR/05012026)

Django Development - Udemy (2024)

Python Programming - Certiport (2024)

Java Programming - Wipro (2024)
